RE: Stock Options

In 1998 you were granted 300 Stock Options at a price $150.00 per share. These options were 20% vested when you were granted the options. The remaining 80% of the Options are vested at 20% per year provided the EBITDA objective is met.

In 1999 Attachment Technologies, Inc. (ATI) exceeded its EBITDA target and an additional 20% of these options were vested. For the year ended 2000, the EBITDA target was not met, however, the Board of Directors decided that the options would never the less be vested. In 2001 the EBITDA target was not met, and the Board of Directors decided that the options would not vest. Per the option agreement, these options expire. However, if at some later point in time the Board of Directors decide to reinstate these options, you will be notified. The following is a summary of your Stock Options:

Total Options Granted	300
Initial Vesting	60
1999 Vesting	60
2000 Vesting	60
2001 Vesting	-
Total Vested Options	180
Options Irrevocably expired	60
Options not yet vested	60

The EBITDA target for 2002 was originally established in excess of $19.0 million. This target was established as part of our five year forecast developed at the beginning of 2000. Given ATI's performance, this target is clearly unrealistic. However, the board recognizes that the options are critical to motivating ATI's management team. Therefore, the board has agreed to reduce the target for 2002, potentially lowering a return for the shareholders. In order to get your options granted for 2002, ATI's EBITDA must exceed $15.0 million. If you have any questions about your options please feel free to call.
