If any monitoring wells are subsequently found they should be properly abandoned in accordance with Chapter 567-39 of the Iowa Administrative Code.

This certificate prohibits the Department from requiring a property owner or a responsible party to conduct further corrective action if the only reason is a change in action levels *See* Iowa Code § 455B.474(1)(a)(8)(c). An owner or operator shall not be responsible for additional assessment, monitoring, or corrective action activities at a site for the release (LUST) that is issued a no further action certificate unless it is determined that the certificate was issued based upon false material statements that were knowingly or intentionally made by a groundwater professional and the false material statement resulted in the incorrect classification of the site. *See* Iowa Code § 455B.474(1)(a)(8)(a). However, this certificate does not prevent the Department from requiring corrective action at the site if a new petroleum release occurs. *See* Iowa Code § 455B.474(1)(a)(8)(c). If a previously unknown or unforeseen risk condition should arise related to the release covered by this certificate, the Department, in conjunction with the Iowa comprehensive petroleum underground storage tank fund board, may fund investigation and corrective action to address the risk. *See* Iowa Code § 455G.9(1)(k).

This certificate does not constitute a warranty or representation of any kind to any person as to the environmental condition, marketability, or value of the above-referenced property other than that NFA-qualifying status was achieved upon the date of certificate issuance. *See* 567 Iowa Administrative Code 135.12(10)(b)(6).
