VARIANCE FOR BK 2000 PARCEL N SE ¼ Section 3 Crawford Twp.

Capital City Septic has received a variance from Madison County Environmental Health to install a BK2000 filter as tertiary treatment following the Clear Stream mechanical aerobic treatment unit at the following property:

1677 Mueller Ct., Winterset, IA otherwise described as PARCEL N SE ¼ Section 3 T76N R27W Union Township. Owned by Richard A. Conoan and Denise M. Conoan.

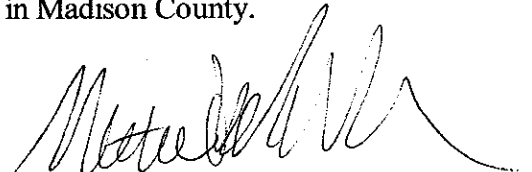

The BK2000 replaces the existing free access sand filter. This variance has been granted under the following conditions:

1. Sampling monthly during the first 3 months following installation
2. Sampling quarterly after the first 3 months until the first anniversary of the installation
3. Sampling 2 times per year according to Madison County regulation for Mechanical Testing.

A service agreement for the onsite wastewater treatment system must be in force the entire time this system is operational. Lack of a service agreement or high test results can result in the wastewater treatment system being declared a failed system by Madison County Environmental Health and will be replaced with a system approved in Madison County.
