RECORD OF INVENTION

Date - March 20, 1952

Francis Mapes, having made a certain new and useful invention which he calls a MAPES WELDING TABLE, does herewith submit a disclosure of the above identified invention in the form of nine photographs to the firm of Talbert Dick, Registered Patent Attorney, Des Moines, Iowa

This invention was conceived on or about the 20th day of January, 1952.

Francis H. Mapes Earlham, Iowa.

TO WHOM IT MAY CONCERN:

Be it known that Francis Mapes a citizen of Madison County, Iowa, U.S.A, has this 20th day of March, 1952, disclosed to me the invention pictured and described on this form and I fully understand the construction, purpose and function thereof.

(Notarial Seal) Charles D. Van Werden Notary Public in and for Madison County, Iowa.

MAPES WELDING TABLE

This welding table is designed for the purpose of holding objects to be welded in any position. It is constructed so that it can be mounted on a stand or an arm from a bench, whichever is most convenient for the user.

The Mapes Welding Table can be made in different sizes to hold different sized objects to be welded. That is, if large objects are to be welded, the table of necessity must be larger; also if larger vises are used.

The Mapes Welding Table is constructed so that it will hold two or more vises so that they can be turned in a circle on the table top from 0° to 360°. It is also constructed so that the vise may be tilted from 0° to 90° on the table top and adjusted apart or together depending on the length of the table top.

The welding table is mounted with two joints so the welding table can be turned in a complete circle from 0° to 360° horizontally and at the same time can be tilted to a vertical position and turned from 0° to 360° vertically. If the welding table is mounted on an arm rather than a stand, it can be turned upside down and at any degree or circle.
